Abstract not available for JP 6511603 (T)

Abstract of corresponding document: FR 2894451 (A1)

A photovoltaic cell (1) including a substrate (2) with a supporting surface (4) over which extends a first electrode (5), and a second electrode (10) isolated from the first electrode (5) by a plurality of layers (14, 16; 14, 24, 16), including at least one first layer (14) of a semiconductor material having an active junction (J) at one interface thereof. Said active junction (J) has developed area greater than its projected area.
